

 VERIFIED CASES · ZAKAT & SADAQAH ELIGIBLE

Neki

Give with trust.

Neki is a donation platform for real, verified cases — a widow's monthly ration, a child's surgery, a village hand-pump, a student's fees. Pick a case, choose your amount, and pay the way you already pay: **Request to Pay** through Raast, or **credit / debit card**. Every rupee is tracked, and each case shows you exactly what it still needs.

About Neki

Donations are held in a dedicated account and released to each case in stages, against bills and photos. Our platform fee is 0% — the full amount reaches the case. Card details never touch our servers; they are handled by our PCI-DSS compliant payment provider.

Cases you can donate to

Each case is verified by our field team. Give once, or set up a monthly gift.

Heart surgery for Zainab, 6

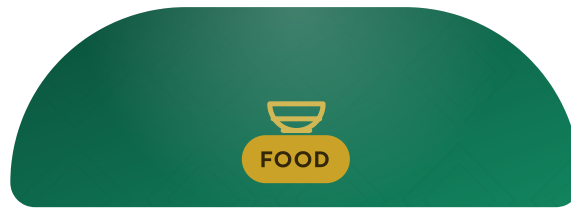

A hole in the heart needs urgent repair. The surgery is booked; the family has covered...

Raised **PKR 620,000** 73%

Goal PKR 850,000 11 days left

Notes on this prototype

These are static screens of a working prototype at desktop width. The amount, the payment method, the Raast ID and the card form all validate and drive the receipt.

Case card → Donate Now → Amount → Payment method → Raast or Card → Receipt

Theme — colours used

- Primary green `#0A4F3A` for buttons, headings and the arch panels
- Gold `#C9A227` for tags, progress and accents
- Ivory `#FBF9F3` page background
- Islamic detailing: a khatam eight-point star behind the page, a mihrab arch on each case card
- Only green and gold appear anywhere

What is simulated

- No real money moves — the Raast request and the card charge are both simulated
- Card numbers pass the Luhn check and the expiry and CVC are validated, but nothing is sent anywhere
- Case progress, raised amounts and donor counts are sample data
- In production card details must go to the payment provider's hosted fields, never to our own server

Where to change things

- Brand name: the word `Neki` in the header, hero and footer
- Currency and fee: the `CONFIG` block — currency, preset amounts, 2% fee, USD rate
- Cases: the `CASES` list — title, tag, description, raised, goal, days left
- Theme: the colour tokens at the top of the stylesheet

Still to build

- Case detail page with photos, bills and payout updates
- Real Raast request-to-pay raised from a server through a payment provider
- Donor accounts, monthly giving and email receipts
- Admin: creating a case, verifying it and releasing funds in stages
